SAVE RIAU

**Members of the Indonesian Delegation for International Youth Forum, Looking
Beyond Disaster (LBD4),**

St. Paul University, Manila, Filipina,

2nd - 6th of April, 2014

PROVINCE OF RIAU, INDONESIA

Riau is a province of Indonesia. It is located in the central eastern coast of Sumatra along the Strait of Malacca.

Riau is currently one of **“the richest provinces in Indonesia”** and is rich with natural resources, particularly petroleum, natural gas, rubber, palm oil and fiber plantations.

SMOKE HAZE DISASTER

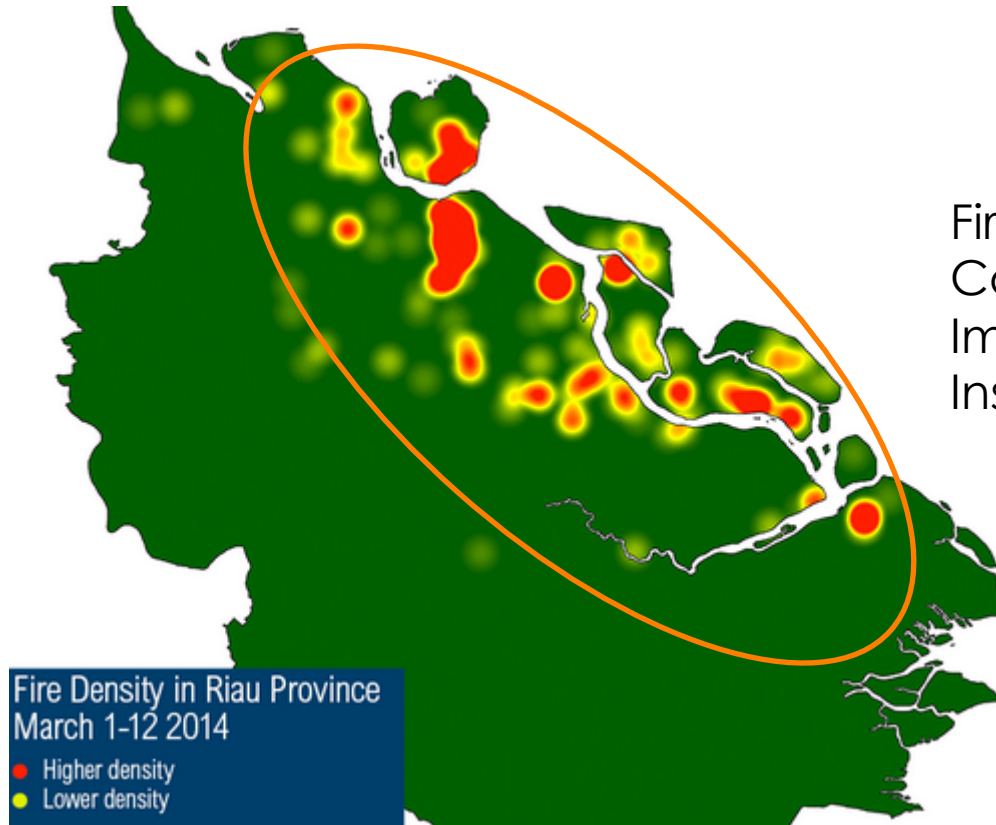

The smoke haze incited by forest fire from illegal activities of palm oil plantation owners and local people has been engulfing the province in the past month.

It's been risking respiratory illness to people living in regencies across the province. As before, roughly half of the fires are burning on land managed by pulpwood, palm oil, and logging companies.

Indonesia's Disaster Management Agency, Dramatic satellite images of heavy smoke plumes show the large amount of pollutants being discharged to the atmosphere. The fires are extensive in areas with deep peat soils, suggesting high volumes of carbon are being released, contributing to **“climate change”**.

Institute.

A thick smoke came from the forest fire.

SAVE RIAU

The most critical area that was caused by forest fire.

SAVE RIAU

One of the burnt forests from many hotspots.

SAVE RIAU

A woman wore a mask when outdoors due to the smoke.

SAVE RIAU

The smoke covered the sky so the sun refused to show itself!

SAVE RIAU

Pollutant Standard Index (PSI) In Pekanbaru, Riau.
“Berbahaya” means PSI reached Dangerous Level for Health.

WHY?

- Human Made
- Land Conflict
- Palm Oil
- Short term economic vision

The impact of this disaster:

- ISPA case
- Traffic disturbance
- Economic Trouble
- Ineffective School Activity

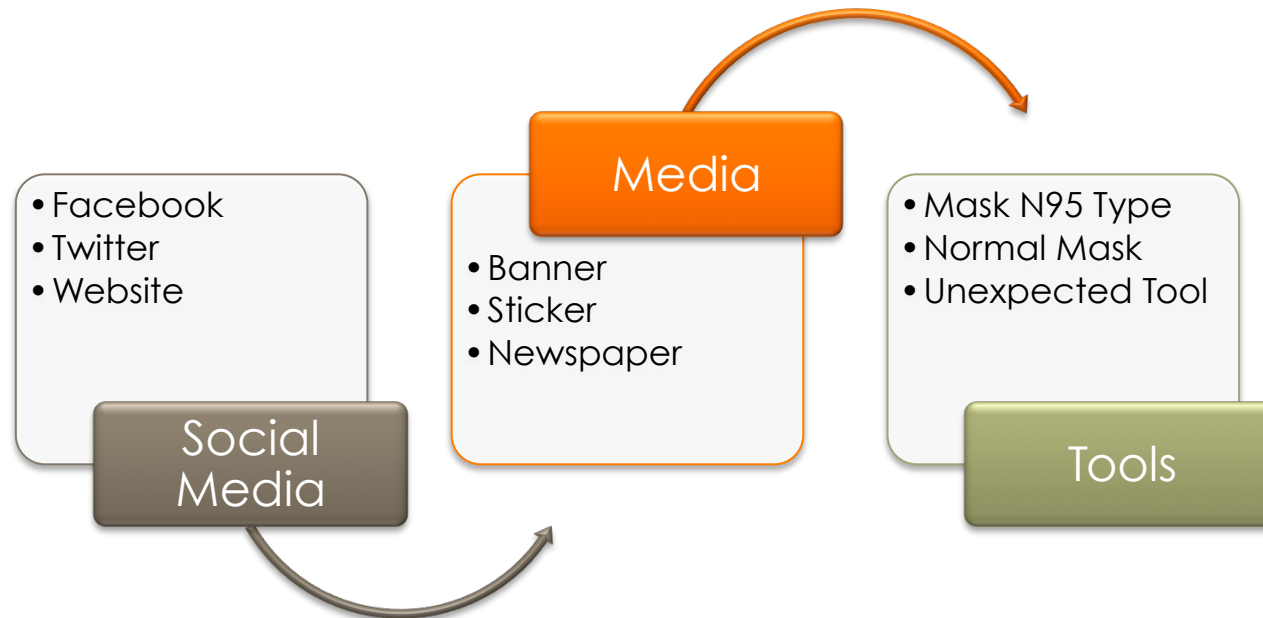

SAVE RIAU

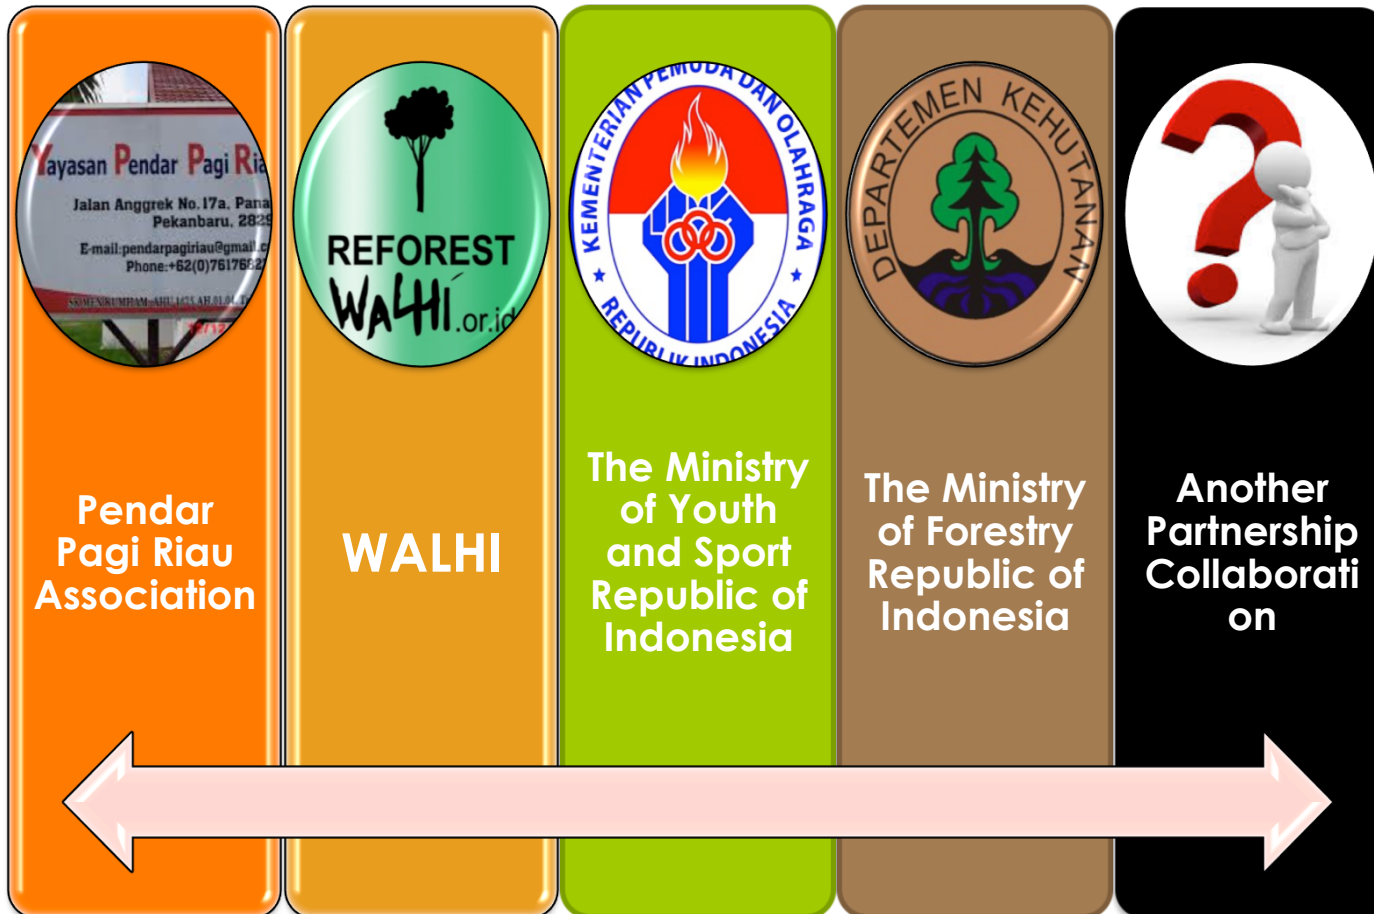

What Are We Gonna Do?

- To make people that living in rural area, aware about the environment issue.
