

Ms. Hayuk Permatasari (Indonesia)

(hayukpermata@gmail.com)

I am a student of Science and Mathematics Faculty, Diponegoro University, Semarang, Central Java, Indonesia. My major is statistics and now I am in the 7th semester. I am 21th years old and I am from Magelang, Central Java. I live in my boarding house at Bulusan Selatan III Street, Tembalang, Semarang.

I am an active student. I had been joining as a member of Kresna Youth Peace Generation. Although I am interested in joining organizations, I also give attention to my academic activities. I like to participate in many seminars, training, and campus activities

I join 7th YPA because I want to tell and share about peace in Indonesia. I also want to know about peace from other countries. It is interesting for me to discuss about peace problem and critical global issues that are happening in the world with other youths. I will use my skills to do many things about peace and social activities for a better life of all people in the world. My knowledge will also help me to give opinion and solution about that problem. I think, now is time to take an action, and YPA is the right program to arrange a meeting for youths who care about others to share peace, discuss problem, plan solution, and take action. Being a youth ambassador is my step to give contribution in taking actions and applying them. It is a good event to build peace in the world through empowering youth.
