## Background :

- Realizing conflicts between high school students in Yogyakarta.
- Even though the student fight usually happens between boys, but there are also some cases involving girls
- We already had this plan since last year while studying in the Introduction for Peace Studies class. So this plan is based on the result from our class project (survey about student fight between high schools in Yogyakarta).

*If we begin with the need to survive, we immediately see that peace is a primary requirement of the human condition itself*

- Johan Galtung
